Mr. Garfield was an Episcopalian at the General Rate.

It is said that he was a very respectable man, the idea of his death being the only thing in his character that was not really true. He was a man of much power and authority, and was always respected by the people who knew him. He was a man of great influence, and was always admired for his ability to think and act. His death was a great loss to the community, and he will be remembered as a great benefactor.

The house where he lived was a large and handsome one, and was always admired for its beauty and elegance. It was a fine specimen of the best architecture of the time, and was always regarded as a model for the construction of similar buildings.

It is said that Mr. Garfield was a great favorite with the people, and that he was always well liked and respected. He was a man of much tact and ability, and was always able to get along with others. He was a man of much perseverance and determination, and was always able to carry out his plans.

The funeral was a great event, and was attended by a large crowd of people. The body was placed in the church, and was surrounded by a number of friends and relations. The service was conducted by the clergy, and was attended by a large number of people. The funeral was a great event, and was attended by a large crowd of people. accompanied by my daughter Miss Louise, and our daughter-in-law, Mrs. M.B. Suggs, and Mr. and Mrs. W.L. White, all of whom have been at work this week preparing for the big event. We have been working on our fields and in the garden, and we have been very busy. I am glad to report that we have not been without blackberries or strawberries, and we have been very happy with them.

Tuesday morning the meeting was called to order by the president, Mr. J.A. Martin, who presided throughout the meeting. The minutes of the last meeting were read and approved. The treasurer's report was presented and approved.

The next business item was the reading of the research papers. Mr. J. Martin presented a paper on the effects of fertilizers on plant growth, and Mr. J. Brown presented a paper on the use of pesticides in agricultural production. Both papers were well received and discussed.

After the research papers, the business of the day continued with the discussion of the budget for the next year. The committee presented a balanced budget, which was approved by the members.

The meeting concluded with the election of a new board of directors. Mr. J. Brown was elected as the new president, Mr. J. Martin as the new vice-president, and Mr. J. Davis as the new secretary-treasurer.

The meeting adjourned at 3:00 p.m. and Mr. J. Martin moved that the meeting be closed with the invocation pronounced by Mr. J. Brown. The meeting was closed with a prayer.
Mr. and Mrs. T. E. Kell passed Friday morning for Charleston to Columbia yesterday after spending Yorkville Saturday morning and returning to his home yesterday night.

Mr. and Mrs. T. C. Strong, of Cornwall, came yesterday from a two days' visit to his daughter, Mrs. W. M. Reynolds, of Sumter. Mrs. T. C. Strong, who has been visiting her aunts, Misses Rachel and Emma, at Sumter, is visiting Mrs. J. C. Robinson.

Mr. and Mrs. W. M. Hutton, of Sumter, are visiting their parents near Blackstock to stay a few weeks with Miss Vangle Wyile in the Bradford has returned yesterday morning for the home of her aunt, Miss Vangle Wyile, who has been visiting her aunts, Misses Rachel and Emma, at Sumter. Mrs. T. C. Strong, who has been visiting her aunts, Misses Rachel and Emma, at Sumter, is visiting Mrs. J. C. Robinson.

Misses Laura and Juliet McIlrory, of Sumter, arrived Saturday night to spend a few days with Miss Belle Miller. They spent a few days in the city by the sea.

Mrs. J. L. Carroll left yesterday for Columbia to spend a few days with Miss Vangle Wyile in the Bradford has returned yesterday morning for the home of her aunt, Miss Vangle Wyile, who has been visiting her aunts, Misses Rachel and Emma, at Sumter. Mrs. T. C. Strong, who has been visiting her aunts, Misses Rachel and Emma, at Sumter, is visiting Mrs. J. C. Robinson.

Mr. and Mrs. T. C. Strong, of Cornwall, came yesterday from a two days' visit to his daughter, Mrs. W. M. Reynolds, of Sumter. Mrs. T. C. Strong, who has been visiting her aunts, Misses Rachel and Emma, at Sumter, is visiting Mrs. J. C. Robinson.

A Problem In Mathematics.

"Every one knows that the world is round," said the teacher, "but how many of you know the science which is used to measure it?"

"I never heard of it," replied John.

"Well," said the teacher, "it is called trigonometry. It is the science which measures the angles of a triangle, and is used in surveying and navigation."

John was interested in the subject, and asked the teacher to explain further.

"Trigonometry is based on the properties of triangles," the teacher continued. "The most important of these is the law of sines, which states that the ratio of the length of a side of a triangle to the sine of the opposite angle is constant for all triangles of the same shape."

John nodded his head in understanding.

"And what about the law of cosines?" he asked.

"That is even more interesting," replied the teacher. "It states that the square of the length of any side of a triangle is equal to the sum of the squares of the other two sides minus twice the product of these two sides and the cosine of the included angle."

John was fascinated by the subject, and decided to study it further.

"I think I'll make a career out of this," he said.

The teacher smiled, pleased with his student's enthusiasm.

John was a quick learner, and soon became one of his teacher's favorite students. He continued to study trigonometry, and eventually became a renowned mathematician, making significant contributions to the field.
