GERMAN SHIP YARDS BUILD SUBMARINES

Baltimore Area of Deutz Ament's Factory-Of Course-As Will See Mr. Bond to Linx.

Newport News, Va., July 12.—(United Press).—Work was still being rushed as fast as possible.

The occupant had unloaded their guns, their men, and their materials. The actual point of contact was not far from the point where the British entered the harbor.

The mayor of a city of two thousand inhabitants, when at a point where a sharp turn had to be made, said, "I don't think I can turn here." The mayor was rushed as fast as possible. That's the way things are. That's the way they always have been.

The advent of the submarine has changed the whole picture.

The mayor of a city of two thousand inhabitants, when at a point where a sharp turn had to be made, said, "I don't think I can turn here." The mayor was rushed as fast as possible. That's the way things are. That's the way they always have been.

The work of clearing and leveling for a new school has come to an end. The new school, which will be built on the site of the old one, is expected to be completed within the next six months. A large number of volunteers have worked on the project, and the community is grateful for their efforts.

The York County News items:

- The Campbell Settlement company of York, which has the contract for the new school, has completed the erection of the school building. The structure is a two-story structure, with a new wing being added in the future.
- The new school will include classrooms, a library, and a gymnasium. The total cost of the project is estimated to be $200,000.
- The school will be opened in September, and classes will begin on the first day of school.

The features of the programme, in particular, were quite impressive.

POSSIBLE DULL IN YEAR'S BUSINESS

- The president of the company, Mr. A. B. Hunter, said that the company was optimistic about the year's business. He pointed out that the cotton mills were closed down, and he expected a recovery in the future.
- The company has been able to maintain its production, and it expects to expand its operations in the future.

RICHARD J. BROWN

- Richard J. Brown, the general manager of the company, said that the company was well prepared for the year's business. He pointed out that the company had a large stock of cotton and that it was prepared to meet any demand.
- Mr. Brown said that the company was optimistic about the future, and he expected a recovery in the near future.

JULY AND AUGUST VACATION MONTHS

- July and August are usually quiet months for the company, but the company expects to have a busy summer. Mr. Brown said that the company would be open for business throughout the summer.
- The company will be closed for the entire month of August.

SCORCHING BURNING GLOSSING

- The company has been able to maintain its production, and it expects to expand its operations in the future.
- The company has a large stock of cotton, and it is prepared to meet any demand.

The Winter Garden

It is useless to say a word about the value of a winter garden because everyone appreciates fully the importance of an accessory of fresh vegetables during the winter.

There are a number of vegetables that can be had during the winter season, but to have them they must be grown and sold during the time of year when there is a scarcity of vegetables. So just because we have all that we need to eat, we should not be as careless in planting a winter garden.

 Probably the vegetable of first importance for winter is the potato. This crop is so important that a good potato makes excellent garbage out of curds and whey. It is usually best to mold them with straw and thereby retain the moisture. Probably the best variety for this purpose is the "Round Purple Mountain." One of the most important vegetables for winter is the Rutabaga. It is planted about the first of June and transplanted about the first of September, and is usually ready to eat at any time after the first of October, and will be ready for use by the middle of November. Growth is rapid, and large quantities are required for this purpose.

Kale is a very satisfactory winter salad and should be sown in the early fall. The cured broccoli is a very good one for winter salads.

Spinach planted in early fall in a rich place will make excellent salad. The Bloomstare long spring variety is recommended for this purpose.

Paradise and carrots planted in June will be ready for use in the early fall and will keep in the open ground most of the winter.

Beets and cabbage should be sown in the early fall and will keep in the open ground until the spring. Beets, if well treated, will remain dormant until early spring when they will grow rapidly and will make excellent garbage out of curds and whey. Market beets, if large and well grown, are excellent varieties for this purpose.

Celery or vegetable celery should not be earlier than April first for planting.

Spinach planted early in September and with favorable seasons produce edible foliage before first frost.

For late or fall tomatoes the seed should be sown in the open ground in June and the plants transplanted to cloches covered with straw and hayed away from frost about June 15th. Boston, Market, are excellent varieties for this purpose.

Celery or vegetable celery should be sown in March for early market.

For winter use the Rutabaga is probably the best kind of turnip. Rutabagas should be planted between the 1st of August and the 1st of September, and thinned out six to eight inches in the drills.

Kale will keep much better than those grown from sprouts if the potatoes are stored separate from the kale.

These beans, Kentucky Wonder variety, planted in the last part of August or early September will do.

For fall beets the seed should be sown the first of September and will be large enough for use by the first of November. Two sowings may be made during the winter months for March and April use.

These beets, Kentucky Wonder variety, should be planted in September, October and November for winter use.

With this abundance of vegetables that it is possible to have during the winter months, we find ourselves well supplied with the items that are so essential to the health of the body.
