ITALIAN IMMIGRANTS.

They Are a Valuable Element.

Our Citizenship — Their Education.

Dr. Charles Alcott, of the American Social Science Association, has published a paper before the New York State Immigration Committee, which is doing work in behalf of the immigrants. The paper is entitled "The Immigration Question." It is a valuable document, which deserves careful study. The paper is in four parts: (1) An Introduction; (2) The Distribution of the Italian Immigrants; (3) The Influence of the Italian Immigrants in the United States; (4) Concluding Remarks.

Dr. Alcott's introduction is as follows:

"The immigration of the Italians into this country has been a subject of much discussion and debate among the people of the United States. The question has been raised whether the influx of the Italian immigrants is beneficial to the country or not. The question has been answered in the affirmative by many writers, who have shown that the Italian immigrants are a valuable element in the American labor force. The question has also been answered in the negative by others, who have shown that the Italian immigrants are a burden to the country.

"The Italians are a hardy and industrious people. They are willing to work for a living, and they are willing to work for a just wage. They are not averse to hard work, and they are not afraid of the hardships of life. They are a people of limited means, and they are not averse to the idea of saving money. They are not a people of the idle, and they are not a people of the lazy.

"The Italians are a people of limited means, but they are a people of limited means. They are not a people of the poor, and they are not a people of the rich. They are a people of the middle class, and they are a people of the working class. They are a people of the common man, and they are a people of the common man.

"The Italians are a people of the common man, and they are a people of the common man. They are not a people of the aristocracy, and they are not a people of the royalty. They are a people of the common man, and they are a people of the common man.

"The Italians are a people of the common man, and they are a people of the common man. They are not a people of the rich, and they are not a people of the poor. They are a people of the common man, and they are a people of the common man.

"The Italians are a people of the common man, and they are a people of the common man. They are not a people of the aristocracy, and they are not a people of the royalty. They are a people of the common man, and they are a people of the common man.

"The Italians are a people of the common man, and they are a people of the common man. They are not a people of the rich, and they are not a people of the poor. They are a people of the common man, and they are a people of the common man.

"The Italians are a people of the common man, and they are a people of the common man. They are not a people of the aristocracy, and they are not a people of the royalty. They are a people of the common man, and they are a people of the common man.

Over-work weakens the body, not only by exhausting its strength, but by weakening the vital forces necessary to its proper development. The每一位 organ and every function is impaired. The heart may become diseased, the lungs weakened, the nervous system upset, the digestive organs impaired, and the whole system made more susceptible to disease. This is the reason why so many people who work hard are unable to keep up with their work, or to enjoy the pleasures of life. The remedy is to rest, to eat well, to sleep enough, and to exercise regularly. The body needs time to recover from the strain of work.
