The Lantern, Chester S.C.- September 17, 1901

J T. Bigham
THE END OF SATURDAY MORNING.

After Constantly Brightening Hopes that the An-assean's Purpose Would Be Defeated, a Turn for the Worse Came, and a Nation's Joy Was Slein Turned to Tormenting.

That early this morning, the hastily was whisked away in an electric nine were administered, and, as a result, the president sank toward collapse. Shortly after 2 o'clock, the physi-*

*All the doctors present were convinced that the crisis might be prolonged, but without hope of recovery. The president's condition had somewhat improved, but the doctors were extremely critical of the case. There was better response than previously, but the condition and the winter was not expected to improve. They gave him oxygen and the president grew fainter and fainter. The doctors decided that the risk was too great and that the only hope was to give up. The patient was placed in the home and kept in bed. Oxygen had been administered and the window was opened. When the doctors left the sick room, the patient seemed to be better. The doctors hurried off after those...
The Dead President.

President Garfield—Ballot May Have Been Poisoned—Autopsy Results Published—Sept. 14.

Secretary of State says that when Mr. Garfield's "toy" in his breast was removed, the internal organs of the body were normal, but that the bullet was the cause of death.

The assassination occurred in the presence of a great assemblage, and the body was not examined until the next morning. The bullet was removed, but the doctors were unable to determine the cause of death.

The Ballot May Have Been Poisoned.

The extracted ballot from the pocket of the assassin was examined by the doctors, and it was found to be pure and clean. This fact is quoted by the Secretary of State, who says that it is impossible to determine whether the poison was administered by the assassin or by another person.

The Autopsy Results Published.

The results of the autopsy were published on the 15th of September, and they showed that the cause of death was the bullet wound, which had been inflicted by the assassin.

The Case of Garfield.

The case of Garfield is the subject of much speculation, and it is believed that the bullet was not the only cause of death. It is said that the assassin had a丰富的背景 knowledge of the medical profession, and that he may have used some other instrument in inflicting the wound.

The Bulletin of the American Medical Association.

The Bulletin of the American Medical Association, published on the 14th of September, contains a detailed description of the case of Garfield, and it is believed that it will be of great interest to medical men and other persons who are interested in the medical profession.

The Los Angeles Daily Times.

The Los Angeles Daily Times, published on the 14th of September, contains a detailed description of the case of Garfield, and it is believed that it will be of great interest to medical men and other persons who are interested in the medical profession.

The Bulletin of the American Medical Association.

The Bulletin of the American Medical Association, published on the 14th of September, contains a detailed description of the case of Garfield, and it is believed that it will be of great interest to medical men and other persons who are interested in the medical profession.
Mrs. J. N. Cross has returned from Pawley Island.

Mr. S. J. Ferguson has a toad on his hand and he will expect somebody to pay five dollars for it.

Mr. S. E. True, of Rock Hill, has returned from West Virginia, and now you may hear him if you have a chance. If you have anything to exhibit in your line, I am showing the best goods and can turn out better goods for less cash than ever before. You are invited to see how well Kluttz did his work.

Miss Anderson, S. C.

We have never heard Ralph Bingham, but you have heard him before this advertised. If you have heard him before this advertised, we have heard him before. If you have not heard him before this advertised, you will hear him in Yorkville this week. He went to New York for the Alkahest and Mrs. J. M. Cochran, who has made Roosevelt. The new president is surprisingly high estimate of military prowess. —
