THE ROBBER'S GRAVE AT MONTGOMERY
To a member of the Legislature at Montgomery came a remarkable story of the late war. He said, "I was ordered to accompany a party of soldiers to the river. On reaching the opposite shore we were met by an officer, who asked us if we knew of a certain man named. The soldiers were ordered to search the woods, and the result was that a man named. was found dead in a hole, with a bullet in his skull. The body was buried, and a stone put on top to prevent its being disturbed. Later, when the troops were ordered to leave the place, I was called back by the officer, who said, "You are to take charge of the grave and keep it from being disturbed."

I took the charge, and for many years I was the only person who knew of the grave. When the war was over, I went back to the place and found that the soldier who had ordered me to take charge of the grave had been killed in battle. I then thought it would be best to get the body out of the grave and put it in the cemetery. I did so, and the grave was then closed."

It was a common mistake to think that the grave was empty, but I knew better."

A common mistaken idea

When you think of a road covered with iron, the first thing that comes to your mind is its vastness, its strength, and its durability. But did you ever stop to think how easily it will rust, and then that it will rust, and your road is gone. Rubberized Roofing doesn't rust—nevers leaks—easily put on—less resistant to iron or chips—less cost. You save money on putting it on—save money on the actual cost.
