CHESTER, S. C., FRIDAY, SEPTEMBER 15, 1900.

BOOT'S GRIEVANCE.

Killed Lincoln. Mr. E. D. Ho
drew attention to the fact that
President Lincoln was assassi
ated for his life. He believed
that Booth was not an unfortu
nate, but rather a man who
would have welcomed the
news of the death of Lincoln.

BLOODY DEATH.

The Times of February, 1869,
1869, contained an interesting history of the attempted assassination
of President Lincoln by John Wilkes
Beard (sometimes called Beaf)
and his accomplices. The article
will increase interest in the
result. It is said that W. L. Wil
son, President Lincoln's half
brother, was with President Lincoln until a few hours before his death.
He promised to save the President's life, and went to Sandusky,
where he believed Secretary Stanton, on leave of absence from
Washington, was located. Mr. Lincoln's promise was fulfilled, and
that when Booth was executi
ned, he was executed for saving
his life.

**Laughter, Death.**

We have not the figures before us, of a really very difficult problem. The trouble is that the mills, oil mills and the like, are paying taxes at 60 per cent of the value, while there are others who are paying property taxes at 4 per cent.

The man in the middle speaks up for the mill men, and a few of them have asked for a special assessment, but they have not obtained their way. The practical application of the system has been to receive money and then to give it away. The bill is to return 50 per cent of the money to the property owners. It is a matter of dispute as to whether the assessment was in the beginning more than the old tax.

It was thought at first that the assessment was in the beginning too high, but it came to be accepted. The assessment was put up to the mill men, and they were asked to give it a try. It was proposed that the mill men should have a chance to vote on the matter, and it was then discovered that the assessment was far worse than the old tax.

The man in the middle made a speech in this way: "We have not the figures before us, of a really very difficult problem.
