WASHINGTON, Oct. 1.—The State Department announced to-day a statement to the effect that the problem of keeping the boll weevil out of Texas and the surrounding states is going to be attacked with unusual energy.

The statement was made by J. W. D. Dodson, Director of the Bureau of Entomology and Plant Quarantine of the U. S. Department of Agriculture.

In his report, Mr. Dodson states that the boll weevil has invaded 13 southern States and is known to be in 93 counties in these States.

The boll weevil is a destructive pest of the cotton crop and the Bureau of Entomology and Plant Quarantine is making a thorough, systematic investigation of the problem in all regions affected.

The statement was made that the boll weevil is not now destroying the cotton crop to any great extent in Texas, but the Bureau of Entomology and Plant Quarantine is making a thorough investigation of the problem.

Every grocery store has its customers who order POSTUM regularly instead of coffee.

They are former coffee drinkers who, for health's sake, changed their table drink.

If you suspect that coffee contributes to your discomfort or illness, ask the grocer for the names of several POSTUM users in your neighborhood; get in touch with them and hear their story.

Or, secure a tin of INSTANT POSTUM and try it on the family table for ten days instead of coffee.
